Foster collaboration and maximize wall space with customizable high-performance writing boards.
a³ CeramicSteel Workwall offers a custom writing system that leverages all available wall space for endless collaboration in any environment.

Enhanced Collaboration
When people work together, innovation happens. Today’s workers collaborate more than ever, and they need spaces that support them. a³ CeramicSteel Workwall provides a floor-to-ceiling workspace, eliminating the need for multiple boards.

Limitless Coverage
A series of vertically oriented whiteboard panels are spline-jointed together and trimmed with an aluminum extrusion on the outer edges. Floor-to-ceiling a³ CeramicSteel Workwall is a custom-ordered product that can be cut to size on-site by certified local installers.

From smaller spaces featuring two to three panels to large areas with five or more, there’s no limit to wall coverage with the ability to mount panels side by side.

The smooth glass-like surface serves as both a highly functional platform for boundless communication and a design feature to aesthetically enhance any environment. With a clear marker-to-whiteboard color contrast, a³ CeramicSteel offers readability not found with other surfaces. It’s also magnetic, easy to clean and fully scratch resistant. In fact, it’s so durable that it has an expected life cycle exceeding 50 years.
Ideas for Use

Leverage vertical wall space in all types of collaboration areas:
- Conference rooms
- Enclaves
- Design studios
- Private offices
- Classrooms
- Training spaces
- Administrative spaces
- Breakrooms

Features
