Product Environment Profile (PEP)
Americas

CeramicSteel Motif

Product Environment Profile is an environmental declaration according to the objectives of ISO 14021. Precise, accurate, verifiable and relevant information on the sustainability attributes of a³ CeramicSteel Motif.

Motif is an award-winning, high-performance collaborative panel system that can be configured in countless ways to turn unused wall spaces into places where teams express and share ideas together.

The model chosen for analysis from the a³ CeramicSteel Motif range is reference MTFPNL.

Final Assembly Location
Final assembly of a³ CeramicSteel Motif is in Walker, Michigan, USA for PolyVision and Steelcase, for the Americas market.

Recycled Content
Pre-Consumer: 8%
Post-Consumer: 14%

Recyclability: 52%

[1] Calculations of recycled materials exclude packaging and are based on data provided by professional organizations, suppliers and other available information. Recycled materials are determined by weight and defined in accordance with ISO 14021. This data may include industry averages, ranges or other broadly-based information. PolyVision makes conservative assumptions when compiling this information to provide the most accurate recycled content calculations possible but variability in market conditions or manufacturing processes may result in higher or lower content. This document will be reviewed and updated periodically and is subject to change without notice. Recycled content may include pre- and post-consumer materials:

- Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.
- Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

[2] In locations where recycling is available. To be compliant with applicable regulations, PolyVision calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold. PolyVision offers services to assist customers with end-of-use options including resale, refurbishment, charitable donation, and recycling.

Indoor Advantage™ and Indoor Advantage™ Gold are trademarks of Scientific Certification Systems.

[4] Building standards and initiatives
LEED®—an acronym for Leadership in Energy and Environmental Design™—is a registered trademark of U.S. Green Building Council®. These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product. Refer to www.usgbc.org for LEED Program details.

The WELL Building Standard® is the first standard to integrate human health and wellness into the design, construction, maintenance and operations of buildings. Learn more at WELL certified.com.

Steelcase sustainability related actions and results are communicated annually in the Corporate Sustainability Report.
