

Adler-Alpika Servis Tunnel

Date : 23/01/2014

PolyVision partnered with Bautrade and Front Engineering to provide smooth, durable Flexible 3 wall panels for the main road tunnel of the new traffic corridor built for the 2014 Winter Olympics in Sochi, Russia. This new transportation route serves as the primary passenger artery for the games, combining railway and road traffic. It extends nearly 48.2 km (30 miles) from Adler Alpika, where the airport is located, and leads into the mountain ski resort Alpika Servis.

Partner: [Bautrade and Front Engineering](#)

Completion Date: 2014

Product Used: [Flexible 3 Panels](#)

Area: 18,000 m²

Architect: Design Bureau, 'MinskMetroproject'
